(S/NF/SK) MISSION: 1.

- (S/NF/SK) VIEWER CUEING: First cueing was to the site, at 2. encrypted coordinates 684304/716930. After site contact was reached, further cueing consisted of a movement command; "The target is an object".
- COMMENTS: (SZNEZSK) 3.
  - 025 has gained an excellent structural awareness, as evidenced by continued self-correction when errors occur.
  - Structural errors are becoming rarer, centering b. principally around grammatical awareness (Descriptors, which tend to be adjectives and adverbs, normally go into the S2 column, but are often placed into the Tangibles column. For example, "green" will be seen as a tangible object instead of a descriptive clue that there is an as yet unperceived object [noun] present. The danger here being that the acceptance of "green" as the tangible itself might then eliminate the viewer's need to further describe the object.)

c. O25 effectively accessed and described the general target site, but had not completely "zeroed in on" the specific target object by the end of the session time. The target object will be used as the tasking for the next session.
